Quote:it was my first staffing job that worked! I have 2 pages in my notebook of "YOU DID IT!" along with the date from what I remember
Great story! Was that your square nurse watch?

Quote:My full time job keeps getting in the way of spending time tearing apart watches...for now. That and my side activities stop me getting the repairing skills. I master the cal 640 taking apart part though. Except a mainspring screw, I will come back to that one someday.

Quote:Helpless Jenneke, do you need full 210 movements or do you too have some to be repaired?
I hope I will swap parts and fix my first movement before my retirement. 35 years left. For now I choose the 210 working movement. Mike, thanx, I will sent you a pm.
