Almost certainly 1953. During 1953, Gruen stopped putting serial numbers on the movements. This case # is Gruen house line F10468. I've catalogued a 460-825 with Gruen house case # F003569, movement serial # 1L 76242.

BTW, can anyone confirm my suspicion that this is a Swiss-made case? Although unmarked, the printing & layout match the Swiss cases produced for the European market.
