Hmm, one of the very last imports, "Import 320". The last one is Import 326 which should be late 1957 or early 1958. So "G" could well be 1957. Why in front? Probably because it was already part of the tooling with the GRUEN logo as one can see. And the serial number was stamped in later during production. Definitely interesting, the first "G" I have seen up to now with an import.
