View Forum Message <> Reply to Message

Size: 17L
Jewels: originally 17J, later 19J
Config: open face
Negative setting mechanism
Dial release: side screws
Dial holes: 1 & 6 positions
Maker: unknown (same maker as 750 semi-thin series)
Adjustments: 5

Here is one of the later Guild 19J variants. Stamped 740. Circa 1922. Sn 1104688. Silver dial by Zelim Jacot

Note that the 750 series semis follow this front plate number series—but a back plate sn appears on them by 1121000 (front plate). BUT the back plate # is a different series, not a shortened version of the front plate #. For example, the 758 with front plate # 1121471 bears # 16740 on the back (bridges).
