Thanks, Bernd. Edit: I think you are correct. I just found the Guild 812 I posted recently (stamped 812 on movement and on dial back). It also measures 22.5mm—10L, not 9.75L.

Anyway, I've updated the title to remove 800/801, as I also note 810/811 are unidentified. It seems Aegler had a Rebberg in most sizes, so I wouldn't be surprised if the 9.75 & 10 ligne were each different calibers. We shall see if more comes to light.
