
Subject: Caliber 200 & 201

Posted by [Case](#) on Wed, 20 Jan 2021 15:23:50 GMT

[View Forum Message](#) <> [Reply to Message](#)

Size: 8 3/4 ligne

Jewels: 15 or 16 (#s only) - possibly cal 200 is 15j, cal 201 is 16j variant

Adjustments: 4 (#s only)

Configuration: hunter

Signed: Gruen W. Co. ("Factory D") or Gruen Guild ("Factory S")

Suppliers

-Factory D - TBD

-Factory S - Straub/Alpina

Example date: ~1919-1921

Serial number(s): front plate only

-Factory D: 38997

-Factory S: unobserved

Dial markings: unobserved

Other info: Re-posting Liz's Factory S "200" variant (with 16J) from previous forum threads. This began its life as an FHF ebauche, but it has a modified setting bridge and custom setting bits--so the usual FHF setting patent is not stamped on it. Noting it, as it explains why the setting bits shown in later movement catalogs (1939, etc.) are different: they reflect a modified/custom version of the "new" FHF setting works patented in late 1926. I doubt this caliber was actually in use past 1926, but Gruen was apparently still buying movements & parts to provide factory repairs.
