Ok. I put them in a kind of table. Case and movement serials not really chronologically paired when the movement starts with an eight.

My watch is an outlier and the only one with Ultra Quality.

A handwritten table on lined paper showing serial numbers for watch cases and movements. The table is organized into columns for 'white' and 'green' cases, and 'case' and 'mov' (movement) serials. The data is as follows:

white	green	case	mov
		E 5094039	86839
509653	74239	E 5094071	75117
E5171229	90657		
5189575	103306		
E 5284448	83685		
uQ			

Handwritten note: 'reinforced' is written near the bottom right of the table.
