Hi and welcome!

You have a very pretty curvex with rope lugs. I thinks this model is called the curvex Portrait. With style number 498 and a 17 jewels movement caliber 440. The movement is "curved", hence the curvex name.

Its from around 1950.

Value... I am sorry but we are not appraisers. That said, many people like the the Gruen curvex. The longer cases are favorites. Your model is for a buy in now on Ebay... or you could look for sold prices to get a ball park idea.
