Subject: Need roller table for a 707

Hey all,
New to the forum and watch repair more generally. Picked up a nice 707 that needed some work. As this is my first repair, in attempting to replace the balance staff I lost the roller table (need to stop working in a carpeted room). After over an hour with the magnets and flashlight I came here. I'm willing to pickup an entire movement if needed, hopefully incomplete or beyond repair, as to limit the loss of a good watch. Not sure if someone out there can help but it would be appreciated!
