Caliber 480 is a 17-jewel patented Auto-Wind movement and is 9-3/4 ligne by 11 ligne (453 Material Catalog). Two other variants exist, the 480SS (sweep second) and the 480-3SS (23 jewel sweep second).

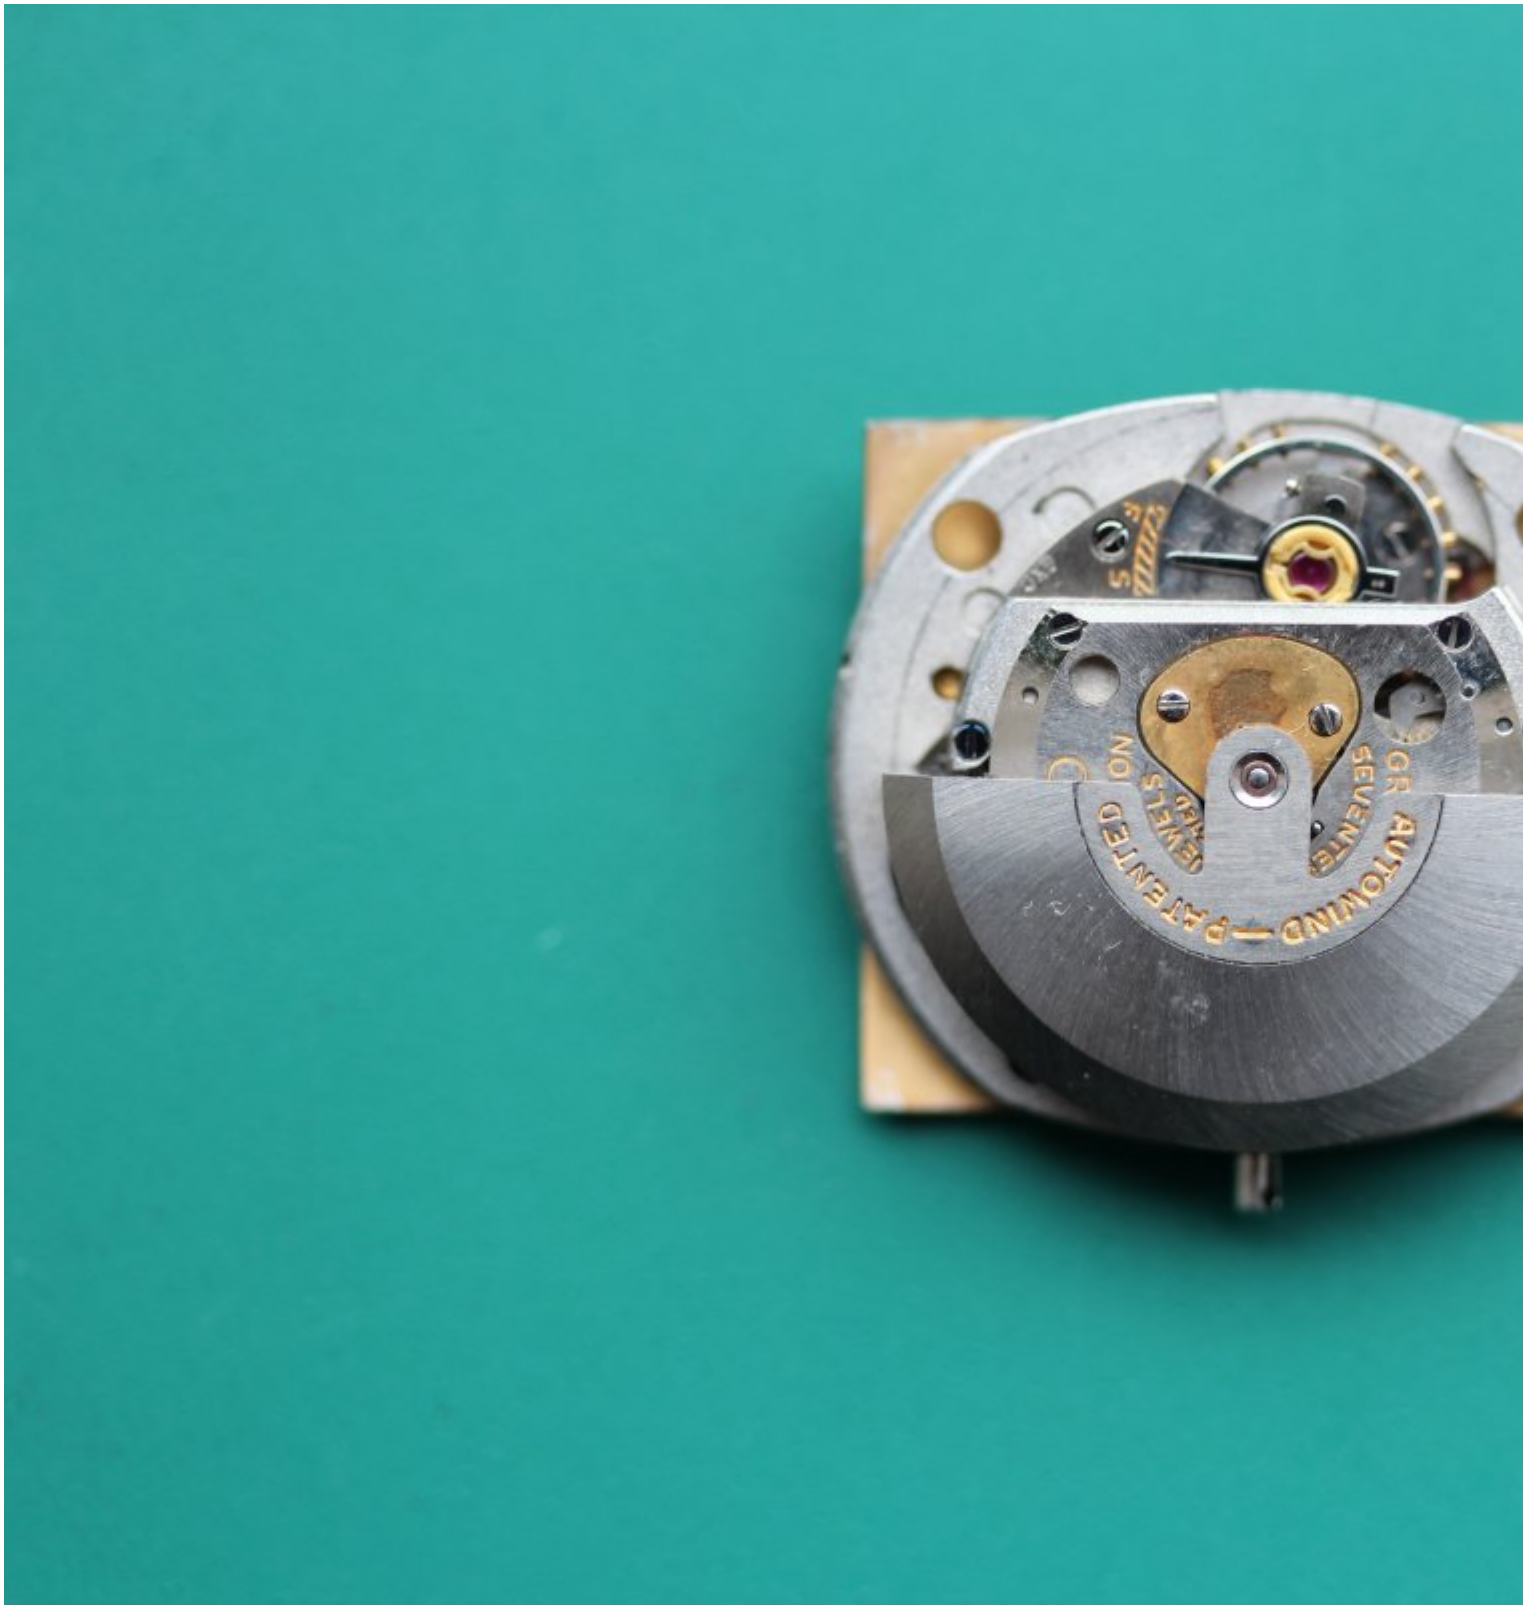

It was introduced in 1951 according to Barry C. & Mike B. dating table and was the first Gruen Auto-Wind caliber with a 360º rotating rotator. Inventor of the new winding mechanism was Henri Thiébaud (Patent US2661591).
