You have a ladies "cartouche" wrist watch. I haven't found an exact match yet. It looks like a cartouche 377, but with a different dial.

The case style number is inside the case back. Your case style number is 78, normally the case back also has the caliber number engraved.

Your watch dates from the period 1928 - 1935.

The movement is swiss. The case is american (in house made by gruen).

Guys, is this a dust proof crown?

Sorry to hear it landed on the floor!
