Thanks, I've got a Croton Aquatime crystal and gasket on the way. That's what I used last time I had one and it seemed like a good fit. But what has me confused is this listing at ofrei.com:

The dimensions are slightly different from the Croton, but awfully close. And I don't think there was more than one model of this style from Gruen, so I would think it almost has to be for the Import 274. But I guess I should take another look through the Master Book to check if I'm right about that. Or I may just order one to check it out.

And Jack, there was another one of these listed a month or so ago. They seem to turn up now and then.
