I recently acquired this Gruen Curvex from ebay. It has 311 movement. The case back has 255 stamped into it. This indicates it is a 1937 with correct movement by using Mike' and Berry's excellent Internet site. I think the name of this watch is a Baron again using one of Mike's books. I am in need of hands for this watch. I think the correct hands are gilt baton or moon hands. They appear to be 8 mm. Any correction to the above is welcome. To find the hands would be great!
