I really appreciate the efforts my confusion about this 52mm, by my measurement, Peer has prompted. I really do not care if a Majesty or Peer. I do not like long cases sized by lug length. For a longest Gruen I have the cheap? 15j flat movement 500 in the 501 long narrow curved case that seems longest I guess because of short lugs and narrow width.

Notice I made spotty dial look better with minor photo adjustments. I will henceforth not waste time here looking for w.w.model names and be satisfied with case numbers like this one 501/296.. Although slightly different cases have same case numbers?
