Subject: The caliber 440 Posted by JackW on Sat, 15 Jun 2013 16:01:05 GMT View Forum Message <> Reply to Message

The caliber 440 is 17 jewels and is 8-3/4 x 9-3/4 ligne or 19.4mm x22mm. It is the third Curvex movement that was produced by Gruen and shares parts with the caliber 430 and 435. This caliber is clearly marked with the number in the space between the barrel bridge and the balance cock.
