I just acquired these two movements.

The 98 stamped movement has 4 adjustments. No precision marking but has a precision marked dial. Has the 51482 patent #

The other 98/99 movement has 3 adjustments. No precision marking. Has the 51482 patent #

My theory is the extra adjustment could be what's making it precision, and not made at the precision factory. Just a hunch.

98 back

98 dial

98/99 back

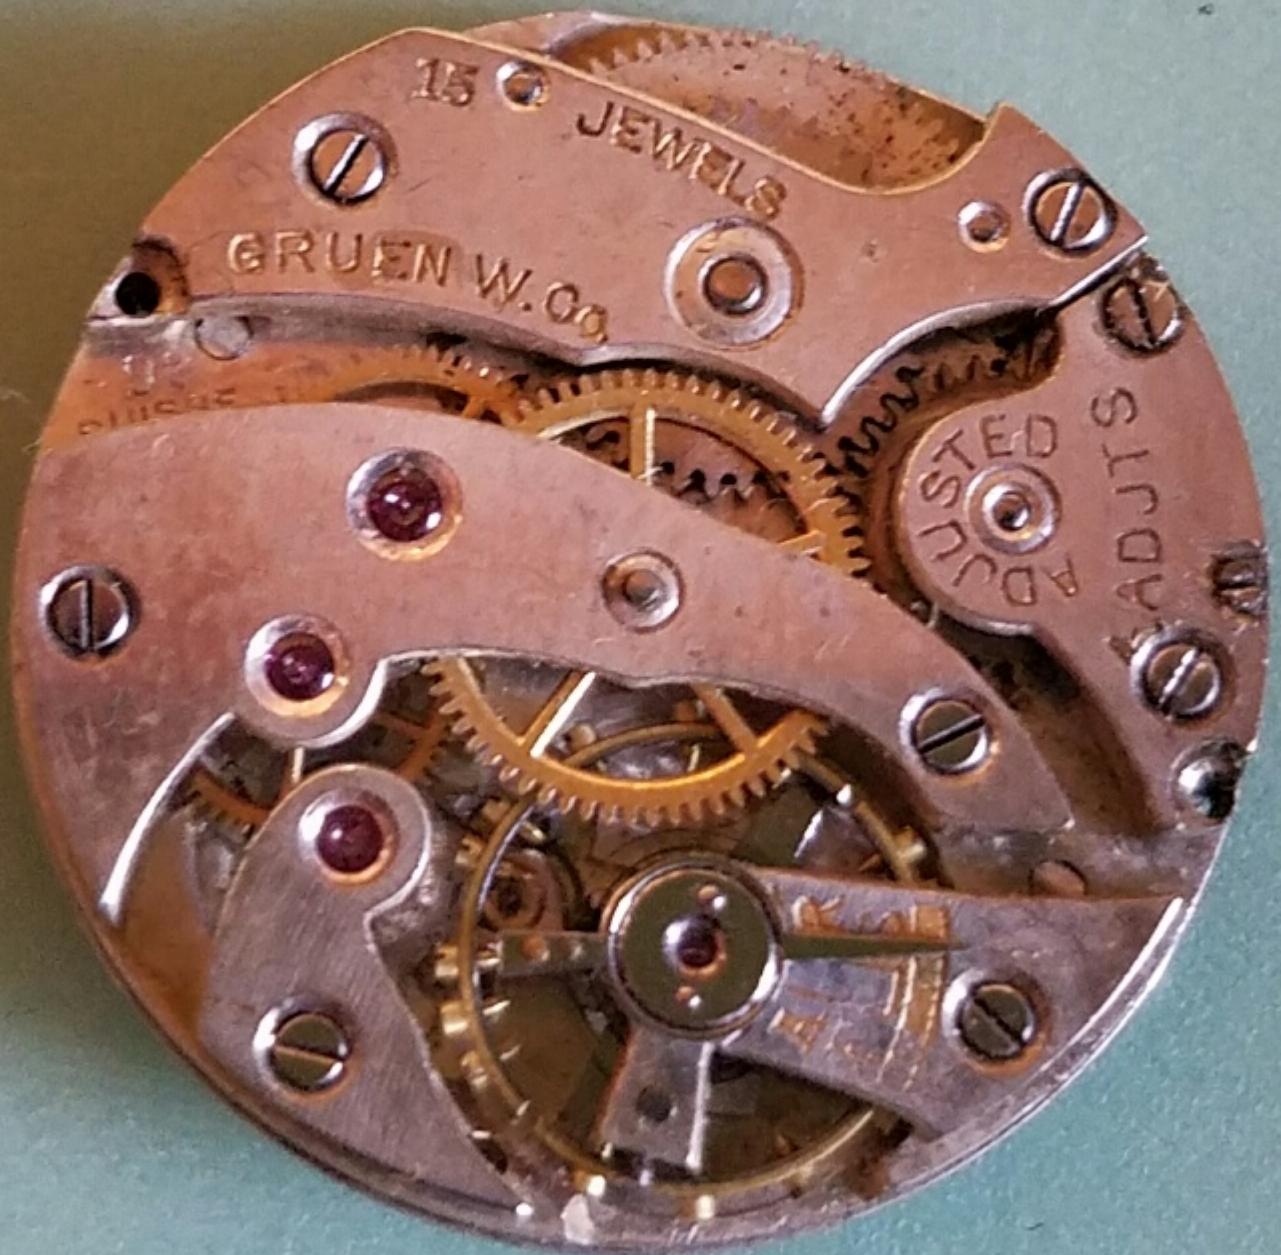

98/99 dial side
