Other info :

I've recently inherited my grandfather's Gruen Airflight. He passed in 1960, and unfortunately my family has no knowledge of this watch's history. I recently had it restored, and the shop provided me the following numbers from inside the case:

Movement Caliber: 422RSS
Other Numbers: 130 / 422SS-108 / 19266

I'd greatly appreciate any information you could provide on the watch. Please note that the bracelet is new (Hirsch), not an original component. Thanks!
