Nice! Your guesses are as good as mine on what it says on the back; Bernd though seems to have it.

btw, Gary... in typing out the case serial, you inverted numbers.

This is the second lowest movement serial for a 311 I've seen. The other one is 352155 which was in a case marked with an Oct, 1935 date. That case # is 2367277. Pretty darn close on both counts to make your's just as early and likely in the first run of the cal 311.
