---

I have a Gruen Airflight Jump Hour watch and would like to get it fitted with a genuine Gruen Watch Stainless strap. The lugs on the watch measure close to 20mm, however, I would like the watch strap to be wider where it meets the watch case, otherwise, it will look out of proportion. The watch case measures approx. 31mm at the lugs. Any ideas? I have looked on ebay but see nothing at the present time.
