Another example with different dial. Lower case serial. Movement 153 with many similarities to your 165. Even the pinkish shine on the movement/bottom plate.

That's cool. :) I like noticing little differences like that, and similarities, and looking out for variations.

Do you have a better pic of dial? I'd like to see it if you can manage. Thanks for sharing.

Likely a silver dial. Found one online that looks like this same style as yours it has "833" and in an oval "STERN 0.935 GENEVE" on dial back.

Cool! Never had a dial removed from my cartouches, but thought the silverish could be silver (or platinized?).
