This is a long shot, I know, but if anyone has a scrap bezel for an Ultra-Verithin, I have a yellow gold watch that is missing one.

I thought I spotted one in a parts case box at the New York regional, but I think it was a complete case. If you can post a picture of one that you are after we'll be at the Florida regional in February, PNW regional in May and Dayton National in June. I guarantee one will pop up.

Also what are you willing to pay, no sense in wasting money.

The case style is plain, as far as I can tell.

As far was what I would be willing to pay, what do you think would be reasonable? Obviously at least scrap gold value, but I'm not sure how far over that I would want to go. Maybe scrap+20?

The watch has had a rough life, but still keeps time somehow.
