Radium dials, confirmed with Radex One.

Astrodate stem is too short to wind it up so can't test. Dial shows some discoloration to the left of the day window. Hands set.

Duke/Viscount automatic weight is rubbing against the case back. Case pitted throughout. Winds/sets. Can be woken up with a partial wind and a shake but stops.

I don't collect radium, so these have to go. Came with a lot of Gruens I bought for a project watch. Please let me know if you're interested!

Free to you, just send me a postage label.

Best wishes!
