Does anyone happen to have a spare 505.6 movement for my 505-5015 watch? I have sourced a FHF96 ST for the time being. But, it would be nice to have a bridge with the Gruen engraving.

You're probably better getting one off of eBay when they are posted. Most here have older vintage movements as parts. I did check though, mostly 510's and some modern auto-winds was all I have on hand.

Good luck!
