Pictured here is a 10K YGF version. The dial was refinished by buffing out the tarnish to a original finish. The numerals are not affected by the buffing action because of the enamel make up. However the Curvex logo on these dials was of normal print and would get buffed away in the process.

Here is another 1943 Captain. This one is also 10K gold fill over silver. The re-dial on this one is one of the best I've seen. Too bad they didn't take time to include the Curvex logo.

The watch looks fantastic on the wrist even for the small 35mm square size of the era. One of my favorite dress Gruens.
